

Equinefit Jumping Saddles

Equinefit saddles are individually designed and made specifically for each horse and rider combination, taking into account the support, depth, shape and materials chosen by the customer.

“From my 20 years experience of working with different breeds and levels of horses and types of riders, I designed and launched a range of saddles that would allow them to enjoy maximum comfort and optimum performance.” Says Rene de Koning, founder of Equinefit.

“I invite you to discover the true potential of your horse.”

Every design starts with a consultation to understand your needs and evaluate you and your horse first hand. The final design will be unique - a custom saddle that will offer the best solution for you and the best fit to your horse. Our saddles are competitively priced when compared with off-the-shelf saddles and offer all the advantages of being made to your exact requirements. Included in our price is your hand-made saddle, the initial consultation and measuring at your barn, and final fitting.

Prices range from around \$4,000 to \$4,500, including consultation and fitting.

Your Custom-Made Saddle

Equinefit's custom jumping saddles are designed to your exact specification. Because there are so many options in jumping saddles, we design every saddle exactly to match the requirements of you, the rider. Rolls and blocks are measured and colors and materials chosen.

During the fitting for your new saddle, you are invited to try different panels, blocks and designs, plus a choice of colors and materials before making a decision. Because we have almost no limits in size and shape, almost any combination can be created, our sample saddles are all designed in a way that demonstrates as many options as possible for the rider.

Once you have chosen which options suit your requirements, we then design a custom saddle that combines all your needs and specifications, which means that no two Equinefit saddles are alike.

To the right are some examples of different custom saddles we have made to clients' exact specifications.

Equinefit also designs custom GP saddles and an extensive range of dressage saddles.
